

Food Waste Disposers Included in National Green Building Standard™ from NAHB

The installation of disposers contribute one point towards achievement of the National Green Building Standard, the ICC/ANSI-approved residential green building rating system.

- There are a minimum number of points required for each of the seven guiding principles of green building.
- The Standard defines what green practices can be incorporated into residential development and construction.
- Disposers can be found in Chapter 8, Section 801.3 on page 64 of the Standard.
- For more information go to <http://www.nahbgreen.com/>

Part of an Environmentally Responsible Solution

Disposers can play an important role in solving the food waste management challenge.

Food waste disposers can be an environmentally responsible alternative to transporting food waste to landfills. And, they can help reduce greenhouse gas emissions.

At capable wastewater treatment plants, food waste can be recycled to produce

methane that can be used as a renewable source of power for the plant. Additionally, certain wastewater treatment plants can process food waste into biosolids to be used as fertilizer. (Check the plant in your area.)

Disposers use only about 1% or less of a household's total water consumption, and cost on average less than 50 cents a year in electric usage.

The NAHB Research Center "Green Approved" product seal of approval recognizes disposers under this new designation. The mark provides third-party evidence that building products meet specific scoring criteria for homes seeking certification to the National Green Building Standard.™

Green Approved Product

For

National Green Building Certification

This is to signify that the following products for residential construction

Food Waste Disposer

Manufactured by

InSinkErator division of Emerson Electric

Have been approved for points toward National Green Building Certification to the ICC 700-2008 National Green Building Standard as shown on page 2 of this certificate.

The NAHB Research Center hereby authorizes accredited verifiers to award these points toward certification when the products are used in accordance with the conditions shown on page 2 and the manufacturer's installation instructions.

This information has been verified by independent third-party testing or evaluation.

Certificate #00015

Signed:

Robert L. Hill, Director
Laboratory Sciences and Certification Programs

Issuance Date: April 29, 2009

Expiration Date: April 30, 2013

NAHB Research Center • 400 Prince George's Boulevard • Upper Marlboro, MD 20774 • www.nahbrc.com

This certificate is not a representation, warranty, or guarantee of product performance or certification of code compliance. For details of the product warranty, consult the product manufacturer.

Green Approved Products Certificate #00015

Products: Food Waste Disposer

Manufacturer: InSinkErator division of Emerson Electric

The use of these products is approved to receive points to certification under the National Green Building Standard practices as noted below:

PRACTICE #	PRACTICE DESCRIPTION	POTENTIAL POINTS AVAILABLE	ADDITIONAL CONDITIONS OF USE TO AWARD POINTS
801.3	Food waste disposer is installed at primary kitchen sink.	1	Product must be installed at the primary kitchen sink.
