

Mounting Adapter (#7 Collar Adapter)

Installation

1. Place mounting flange (3) up over the #7 collar adapter connection lip. It may require a slight force fit.
2. Push mounting flange (3) up out of the way and fit mounting gasket (4) onto the #7 collar adapter connection lip.
3. Move mounting flange (3) down over the mounting gasket (4). Be certain that the threaded fasteners in the mounting flange fit into recesses in the top of the mounting gasket.
4. Attach two screws (5) through opposite holes in the mounting gasket (4) and into the threaded fasteners in the mounting flange (3). The screws should be protruding approximately 1/4 inch below the mounting gasket.
5. Position the disposer beneath the mounting gasket (4) and engage the two protruding screws in the keyhole slots in the disposer body flange. Assemble the remaining screws (5) and turn the disposer into place for plumbing connections. Tighten all screws evenly to secure the unit.
6. After disposer is properly installed, place safety baffle (2) and stopper (1) in collar as required.
